STUDENT/CAREER OPPORTUNITIES

Employment Opportunities

- [Postdoctoral Fellow Position](#) (has been filling) Institute of Occupational Health, National Cancer Institute
- [Postdoctoral Fellow position](#) at the National Cancer Institute for Occupational, Environmental, and Population Epidemiology (National Cancer Institute, NCI)
- [Visiting post-doctoral position](#) in epidemiology of mental health in the Institute for Genome Sciences and Policy, Johns Hopkins
- [Postdoctoral researcher](#) Epidemiology of occupational health at Utrecht University, the Netherlands

Training Opportunities

- [Fellowship](#) in Occupational Epidemiology, Boston Institute and International Association
- [Post-Doctoral Fellowship](#) in Health and Safety of Work at Imperial College
- [Postdoctoral Fellow](#) in Occupational Epidemiology, University of California, San Francisco

Traveling Funding Opportunities

- [Traveling Fellowship](#)

CALL FOR ABSTRACTS

October 15-20, 2021

The Call for Abstracts is now closed

CALL FOR SYMPOSIA

October 15-20, 2021

The Call for Symposia is now closed

CALL FOR WORKSHOPS & COURSES

October 15-20, 2021

The Call for Workshops & Courses is now closed

SPONSORS

Gold Sponsors

Silver Sponsors

Special Thanks

Occupational & Environmental Medicine

To discuss sponsorship opportunities for the conference, please contact [Sally Clifford](#).

ABOUT EPICOH

EPICOH Mission

The Scientific Committee on Epidemiology in Occupational Health (EPICOH) of the ILO has as its main function, promotion of epidemiology among epidemiologists in fields of exposure and the occupational health research network. EPICOH provides a forum for the discussion of problems unique to the study of health and work, with membership open to occupational epidemiologists and other scientists worldwide. EPICOH provides a venue of forums for discussion, critical review, collaboration and education on issues of occupational exposure and human health effects.

EPICOH Philosophy

To foster the study of health and work, EPICOH encourages and supports the following:

- Epidemiological studies on the health effects of occupational exposures
- Collaborative study of epidemiologic, clinical, toxicologic, toxicologic, exposure analysis, and other occupational health scientific disciplines
- Innovative approaches to assessment of epidemiologic problems and application of occupational epidemiology
- The field of occupational epidemiology in the public good
- Investment of scientists from developing countries in EPICOH activities, related data for members from developing countries and establishment of special EPICOH centers throughout the developing world
- The involvement and facilitation of the role of early career researchers.

General Information

Topics addressed by EPICOH members include occupational exposures (e.g. physical, mental, psychosocial, relational, environmental and environmental health effects) (e.g. cancer, cardiovascular diseases, respiratory diseases, injuries), methodology (e.g. biomarkers, experimental design, exposure assessment, meta-analysis, risk assessment, epidemiological surveillance, research methods) and ethics and law.
